

ADBS II

PART A: NO-SQL Software Stack

The goal of this part is to develop an in-depth understanding of non-traditional data processing methods and techniques, their motivation, and pros and cons of their approach. This part starts with the introduction of the Map/Reduce paradigm, outlines some usecases and finally sketches alternatives to the well-known SQL query language.

Part A: NO-SQL Software Stack

- Map/Reduce Programming Paradigm
- Hadoop Infrastructure
- UseCases for Map/Reduce
- NoSQL-QueryLanguages
